Thursday	9am-5pm
Friday	9am-4pm

# Full load pallet quantities

To assist with load building, we have outlined below how many pallets comprise a full load for each of the available pallet sizes. Depending upon the pallet size and product, the number of pallets in a full load will vary, we have outlined below the details for these.

## Pallet size: 1200mm x 1200mm

FULL LOAD = 22 PALLETS

- Cladding Roll
- DuctSlab
- DuctWrap
- Fire Barrier EN
- Flexi®
- Full Fill Cavity Batt
- HardRock® Multi-Fix Angle Fillets
- High Performance Partial Fill Cavity Slab
- NyRock® Cavity Slab 032
- NyRock® Frame Slab 032
- RainScreen Duo Slab®
- Roll
- Rollbatt
- RWA45
- RW3
- Steel Frame Slab
- Timber Frame Slab
- Twin Roll

FULL LOAD = 40 PALLETS

- FirePro® CB50

FULL LOAD = 42 PALLETS

- FirePro® Ablative Coated Batt

## Pallet size: 1300mm x 1200mm

FULL LOAD = 40 PALLETS

- SCB (sizes marked with \* only)

## Pallet size: 2400mm x 1200mm

FULL LOAD = 22 PALLETS

- HardRock® UB34
- RW4 (Plain)
- RW5 (Plain)
- NyRock® Rainscreen 032

FULL LOAD = 20 PALLETS

- High Impact Soffit Slab

## Pallet size: 1200mm x 1000mm

FULL LOAD = 52 PALLETS

- Acoustic Infills
- HardRock® Multi-Fix (DD)
- HardRock® Multi-Fix Recovery Board
- RockFloor®
- RockLap H&V Pipe Section

## Pallet size: 2000mm x 1200mm

FULL LOAD = 26 PALLETS

- Fire Duct Slab (Foil Faced)
- DuctRock® Slab
- SP FireStop EN
- BeamClad®
- RW4 (Foil/Tissue Faced)
- RW5 (Foil/Tissue Faced)
- RW6 (Foil/Tissue Faced)
- Soffit Slab

## Indicative Load Calculator

The Load Calculator forms part of the ROCKWOOL full service offering to make product selection and transportation quicker and easier, providing support to build your loads, ensuring all requirements are able to fit on the vehicle.

Try it for yourself at:

[rockwool.com/uk/loadcalc](https://rockwool.com/uk/loadcalc)

# Helping you meet demand

We are continuing to invest in logistics at ROCKWOOL to ensure that you receive the best possible service – that means getting you what you need, when you need it.

Some of our latest improvements include:

- The ROCKWOOL National Logistics Centre, a dedicated and expert hub for our inward and outbound logistics including a 60,000m<sup>2</sup> hard stand to help mobilise stock faster.
- An upgraded fleet, including branded artic and rigid vehicles for local and specialist deliveries.
- Continual improvements behind the scenes to ensure your products are picked, packaged, and shipped in a timely and effective manner.

# Terms and conditions

At ROCKWOOL, we have been manufacturing and stocking products locally for over 40 years. Our aim at all times is to give you the best possible customer experience.

To help offer you the very best service, we hold stocks in our expanded Logistics Centre in Bridgend of the most popular products. Everything contained in this price list is a stocked item unless it has been designated as Made to Order.

## In stock

Delivery times for In Stock items will be communicated within the order confirmation provided.

If your order is made up of a mixture of In Stock and Made to Order products, the order will be delivered in line with the longest lead time.

The minimum order quantity will consist of one pallet of a single product thickness, unless otherwise stated.

## Made to Order

Identified by a • symbol.

We know that occasionally you need something that's a little out of the ordinary, so we've also listed a selection of Made to Order products – these are labelled within the product tables.

Delivery times for Made to Order items will be communicated within the order confirmation provided.

If your order is made up of a mixture of In Stock and Made to Order products, the order will be delivered in line with the longest lead time.

Orders for Made to Order products cannot be accepted for less than the minimum order quantity displayed. The full order quantity must be taken as part of a single order which may be taken over multiple deliveries over a one month period.

Once ordered, Made to Order products cannot be cancelled, and the full costs will be applied.

Whilst every effort has been made to ensure the accuracy of this price list and its contents, ROCKWOOL reserves the right to alter in the event of any errors or omissions. All prices listed are exclusive of VAT. E&OE.

For our full Terms and Conditions please visit [rockwool.com/uk/tandcs](http://rockwool.com/uk/tandcs)

## Non-Standard Products

Bespoke products not listed within this price list are defined as "Non-Standard Products."

Due to the nature of Non-Standard Products, prices and minimum order quantities will only be confirmed on request (within 5 working days). Lead times will be communicated in the same way as Made to Order items.

Orders for Non-Standard Products cannot be accepted for less than the confirmed minimum order quantity. The full order must be taken as part of a single order which may be taken over multiple deliveries within a period of one month.

## Fabrication plant

Products manufactured in our fabrication plants are subject to a different delivery service. Please see product listing for more information.

Lead times for fabricated products can vary and will be confirmed on receipt of order.

## Re-stocking/Returns

In exceptional circumstances and at our discretion, some stocked products may be returned. You will be responsible for the cost of collection of any agreed returns, and a re-stocking fee of a minimum of 25% of the list price will apply. A credit note will only be supplied if the product returned is in a saleable condition.

Made to Order and Non-Standard products cannot be returned.

## Customer support – aftercare

For POD's, invoice queries, delivery ETA's and complaints, please contact:

**E-mail:** [aftercare@rockwool.com](mailto:aftercare@rockwool.com)

**Telephone:** 01656 868 400 (option 2)

### Opening times:

Monday: 6.30am-5pm

Tuesday: 6.30am-5pm

Wednesday: 6.30am-5pm

Thursday: 6.30am-5pm

Friday: 6.30am-4pm

For complaints related to product quality, please include as much information as possible to help us investigate – material batch number from product label, quantity of material under issue, PO number, and images of the issue under concern.

# Delivery

Whether delivering to yard or direct to site, ROCKWOOL has a variety of delivery option designed to meet your needs.

## Delivery charges

All full load deliveries are made free of charge (UK mainland only). Deliveries of less than one full load will incur charges as outlined below.

Pallet size:		2400mm x 1200mm 1200mm x 1200mm	2000mm x 1200mm 2000mm x 1000mm	1200mm x 880mm	1300mm x 1200mm	1200mm x 1200mm	1200mm x 1000mm

Need help planning your delivery load? Why not use our online load calculator? [rockwool.com/uk/loadcalc](http://rockwool.com/uk/loadcalc)

## Half loads

Subject to availability and to the costs shown in the table above, half loads or more qualify for a timed delivery within a two hour window.

Loads which are less than half full are scheduled over a five working days period. You can secure a timed delivery within a two hour window for an additional charge of £290.

## Collections

Collections in a suitable vehicle can be arranged from ROCKWOOL in Pencoed, Bridgend, between 7am and 12 noon, Monday to Friday.

The ROCKWOOL Customer Support Centre will provide information on this service as required.

**Please note:** all other terms and conditions remain the same.

## Delivery vehicles

Our standard delivery vehicle is a 16.5m articulated HGV, weighing up to 44T, which may not be suitable for all sites. We aim to offer you the most sustainable, practical, and cost effective delivery service possible, so we have also provided alternative delivery vehicle options for you to select from. If your delivery requires any of the options listed below, please contact our Customer Support Team.

Standard delivery	Alternative delivery options – charges listed are in addition to table above			
16.5m Articulated HGV (44 Tonnes)	Moffett + £210	Flat Bed + POA <small>A crane will be required for offloading.</small>	Urban Trailer + POA	Rigid - POA

## FORS

Deliveries requiring FORS Bronze are available at no extra cost on request. FORS Silver and Gold deliveries are available on request for a surcharge.

# Delivery

## Amending orders

For stocked items, orders can be amended without charge up to 4 working days before dispatch or additional charges will apply.

For Made to Order products, if manufacturing has commenced, orders cannot be cancelled or amended, and the full costs of the products will be applied.

## Cancelled deliveries

No customer order cancellations will be accepted after 3 working days following the date of issue of the order confirmation by ROCKWOOL.

### Stocked Items

- For products which have not been loaded, no charges will apply.
- For products which have been loaded but have not left the site, a minimum handling charge of £100 will apply.
- For products which are in transit for delivery, handling and transport costs will apply and will be confirmed by ROCKWOOL Customer Support Centre at the time of cancellation.

### Made to Order Items

- For products which have not been manufactured, no charges will apply.
- For products which have been manufactured, the full order value will be charged.
- For products which have been manufactured and are in transit for delivery, the full order value plus handling, and transport costs will apply.

## Postponed deliveries

### Stocked Items

The storage charge will be £100 per trailer per day.

### Made to Order items

Storage charges will apply for Made to Order product deliveries that are postponed after the product has been manufactured. The storage charge will be £100 per trailer per day.

## Postponed flat bed deliveries

Deliveries requested on flat bed trailers which are postponed within 48 hours of the agreed delivery date will be subject to postponement charges. Storage charges will apply.

## Refused deliveries

Deliveries which are refused for any reason (e.g. windage, weather conditions, etc) will incur costs which will include the delivery and return charges and ROCKWOOL handling fees.

## Redirected deliveries

Deliveries that are redirected from the agreed delivery destination will incur charges. ROCKWOOL Customer Support Centre will confirm these costs at the time of request.

## Split deliveries

We offer limited split deliveries on request where possible.

- Up to 20 miles between deliveries, from £75.
- Other distances POA.

## Delayed off-loading

Waiting time charges at £75 per hour pro-rata will apply if the delivery vehicle is not off-loaded within two hours of the requested delivery time.

### Please Note:

Where you see this symbol different delivery details apply. Please see associated text for information.

If your order utilises our pallet delivery service, please refer to the tables shown below to calculate your delivery charges.

Orders for the Isle of Wight will be delivered to the port only.

### Zone 1

Wales, South West, Central and East England  
From £70 per pallet

### Zone 2

London and South East England  
From £80 per pallet

### Zone 3

Scotland and North England  
From £90 per pallet

### Zone 4

Northern Ireland  
POA

### Pallet information

The rates detailed are based on a 1200mm x 1200mm pallet.

Prices will be higher for alternative pallet sizes.

The maximum pallet height that can be shipped by courier is 2.29 metres.

# Choose ROCKWOOL non-combustible insulation

## The Euroclass system

The Euroclass Reaction to Fire system classifies building products in accordance with BS EN 13501-2018. A products Reaction to Fire classification can be determined by referring to the Euroclass rating. Products classified A1 or A2-s1, d0 are considered non-combustible and those classified B - F are considered combustible.

**Products are classified from A1-F:**

Euroclass	Combustibility
<b>A1</b> <b>A2-s1, d0</b>	Non-combustible
<b>B</b>	
<b>C</b>	
<b>D</b>	Combustible:
<b>E</b>	Will burn and may char or flame
<b>F</b>	
<b>NPD</b>	

Important points to remember...

- To be sure of a product's Euroclass rating, simply check its Declaration of Performance (DoP).
- All ROCKWOOL DoPs are available online at [rockwool.com/uk/dop/](https://rockwool.com/uk/dop/)

# ROCKWOOL Resource Hubs

Digital specification support  
for insulation applications.

Use our resource hubs to identify the right  
non-combustible stone wool insulation  
products for specific applications.

Mapped to key insulation  
application areas, the ROCKWOOL  
resource hubs provide access to  
technical tools, data, guidance  
and installation support all in one  
place:

#### FirePro®

When specifying FirePro®  
products, the suite of resources  
provides guidance on all things  
passive fire protection.

#### Ventilated Façade

Bringing together all relevant  
technical literature, the resource  
hub helps specifiers to navigate  
routes to compliance when using  
ventilated façades.

#### Acoustic

Helping to better understand  
the role of building acoustics,  
specialist acoustics resources  
for creating safe and sound  
environments can be found here.

#### Building Services and HVAC

A comprehensive suite of  
resources designed to save time  
and make it easier to deliver  
robust project specifications.

#### Flat Roof

Support the design of flat roof  
insulation with specialist tools,  
guidance, and technical data.

Explore the ROCKWOOL  
resource hubs now.

# Frame solutions

SCB (Sleeved  
Cavity Barrier)

NyRock®  
Rainscreen 032

NyRock®  
Frame 032

ROCKWOOL frame slabs are manufactured using a unique high-speed spinning process to produce stone wool insulation that is low lambda, to help meet demanding thermal performance requirements.

The slabs are sound absorbent and are Euroclass A1 non-combustible. Available in a variety of widths and thicknesses to suit the typical stud apertures of timber and steel frame constructions.

## NyRock® Frame Slab 032

NyRock Frame Slab 032 is a semi-rigid stone wool insulation slab designed specifically for use between the studwork of external timber or light gauge steel frame walls.

Manufactured using NyRock® technology, the slabs deliver insulation offering a low thermal conductivity designed to help meet thermal building regulations.

Lambda 0.032 W/mK

Pallet size: 1200mm x 1200mm

Product code	Thickness (mm)	Width (mm)	Length (mm)	Pieces/ Pack	Area/ Pack (m <sup>2</sup> )	Packs/ Pallet	Area/ Pallet (m <sup>2</sup> )	Made to Order	MOQ (Pallet)	List price/m <sup>2</sup>

278728	140	570	1200	4	2.74	12	32.83			£23.57

## Steel Frame Slab

Developed for external wall installations, ROCKWOOL Steel Frame Slab can help to meet the requirements (thermal) of Part L of the Building Regulations, by delivering a thermal conductivity of 0.034 W/mK. The slabs are supplied in 600mm widths. This ensures a tight friction fit into standard frames, with no gaps.

# Cladding solutions

SP FireStop EN

RainScreen Duo Slab or  
NyRock Rainscreen 032

SP FireStop  
OSCB

Steel Frame Slab  
or NyRock  
Frame Slab 032

ROCKWOOL cladding solutions offer lightweight thermal, fire, and acoustic cladding insulation suitable for external wall and roof applications.

These include ventilated façade systems and built-up metal wall and roof systems. The ROCKWOOL range of cladding insulation delivers fire protection and acoustic performance, and are available in a variety of thicknesses.

*For detailed information on product performance, please refer to the individual product datasheets.*

## RainScreen Duo Slab®

RainScreen Duo Slab® is a dual-density insulation board which has been developed for use in cladding applications, especially in conditions of climatic exposure.

## NyRock® Rainscreen 032

NyRock® Rainscreen 032 is specifically developed for use within ventilated cladding systems, as well as sealed systems such as curtain walling.

The product can be fitted around brackets and other awkward details, and when tightly butted, adjacent slabs effectively 'knit' together to provide a continuous insulating layer, reducing heat losses that would otherwise be caused by gaps.

## Cladding Roll

Cladding Roll is a lightweight, flexible mat which delivers a combination of thermal, fire, and acoustic performance. Developed for use within built-up metal roof and wall applications, Cladding Roll is available in a variety of thicknesses and can be produced with an aluminium facing to provide tensile strength in vertical wall applications.

## SP FireStop OSCB 25

Specifically designed for use only in conjunction with either RainScreen Duo Slab® or NyRock® Rainscreen 032, SP FireStop OSCB 25\* forms an open-state cavity fire barrier within the building façade, allowing for an open cavity of up to 25mm for ventilation and drainage.

\* Product codes for SP FireStop OSCB 25 will be supplied on receipt of order.

Prices indicated are inclusive of stainless steel pigtail screws and galvanised steel fixing brackets. These items are supplied in a box located at the bottom of a clearly marked pallet. Stainless steel brackets are available at an extra cost of £2.79 per linear metre - please specify when ordering if these are required.

Please contact the ROCKWOOL Customer Support Team for further information.

## SP FireStop EN

SP FireStop EN has been tested in accordance with BS EN 1366-4:2021 and is suitable for use as a linear cavity firestop in both vertical and horizontal orientations. SP FireStop EN has been tested with multiple substrate types, including masonry/concrete, SFS, and composite panels with a stone wool core. SP FireStop EN has also been tested in accordance with BS EN 1364-4:2014, curtain walling - part configuration.

For pricing and further information please refer to [page 40](#).

For detailed information on product performance, please refer to the product datasheet.

# ROCKWOOL SP FireStop EN

**A linear cavity fire stopping solution suitable for vertical and horizontal installation.**

- Tested for use with steel frame substrates, composite panels, and masonry
- Up to 120 minutes integrity and insulation in cavities up to 600mm\*
- Tested to BS EN 1366-4:2021 and BS EN 1364-4:2014
- Suitable for 'installation from below'

\*Subject to the application

# Flat Roof solutions

ROCKWOOL flat roof solutions have been designed to meet the demands of modern roof systems, offering tested, durable solutions.

## HardRock® UB34

Consisting of non-combustible ROCKWOOL insulation faced with an exterior grade non-combustible 6mm fibre cement board, HardRock UB34 achieves a Euroclass fire classification of A2, s1-d0, offering a non-combustible solution for insulating upstands and parapet walls.

Lambda 0.034 W/mK

Pallet size: 2400mm x 1200mm

Product code	Additional information	Thickness (mm)	Width (mm)	Length (mm)	Pieces/Pallet	Area/Pallet (m <sup>2</sup> )	Made to Order	MOQ (Pallet)	List price/m <sup>2</sup>
284556	6mm exterior grade fibre cement board	56	600	1200	72	51.84	•	1	£149.90

When it comes to specifying non-combustible insulation, the majority of focus has been on external walls – but overlooking the roof could introduce a weak link into the building envelope. According to government reports, between 2010 and 2018 there were 4,290 fires in England where the roof was deemed to have been “mainly responsible for the development of the fire”.\* We urge you to push the envelope and specify ROCKWOOL on your build as it is just as important to have non-combustible, thermally efficient insulation on the roof as it is on the façade.

**Lisa Stephens, Product Manager – Flat Roof & Façades**

\*Source: gov.uk - FIRE0603: Primary fires fatalities and non-fatal casualties by item first ignited.

## HardRock® Multi-Fix (DD)

HardRock® Multi-Fix (DD) is a BBA-approved stone wool insulation board faced with a mineral-coated white fleece, compatible with a wide range of adhered and mechanically-fixed waterproofing systems - including bitumen, single-ply, EPDM, and liquid membranes, as well as green roof systems.

HardRock® Multi-Fix (DD) can also be used above rafters for warm pitched roof applications.

## HardRock® Multi-Fix (DD) Underlay Slab

Designed to be installed with HardRock® Multi-Fix DD, HardRock® Underlay Slab forms a base layer within multi-layer solutions. Manufactured from non-combustible stone wool, this product will contribute to the thermal, acoustic, and fire performance of a flat roof system.

For further information on product performance, please refer to the product datasheet.

## HardRock® Multi-Fix Recovery Board

HardRock® Multi-Fix Recovery Board has been developed to simplify the repair and refurbishment of flat roof systems. The product can be used to isolate and prepare the surface of existing roof systems, providing a level surface for the installation of new waterproofing membranes.

HardRock® Multi-Fix Recovery Board is compatible with all commonly used flat roof membranes, including single ply, EPDM, bitumen, and liquid membrane systems (including GRP).

## HardRock® Multi-Fix Angle Fillets

Manufactured from high-density, fire-resilient ROCKWOOL insulation, and faced with a white mineral-coated glass fibre fleece, HardRock® Multi-Fix Angle Fillets are developed to support bituminous waterproof membranes at 90° abutments.

The smooth transitions allow water to run off freely, as opposed to holding in corners, where it could potentially seep into the building and cause structural damage.

Pallet size: 1200mm x 1200mm

Product code	Thickness (mm)	Width (mm)	Length (mm)	Pieces/Box	MOQ (Box)	List price/Linear m
292007	30	75	1200	75	1	£4.73

Orders for HardRock® UB34 & HardRock® Multi-Fix Angle Fillets cannot be used to contribute towards mixed loads. The lead times for these products can vary and will be confirmed on receipt of order. Additional carriage charges may be applied.

## Acoustic Infills

ROCKWOOL® Acoustic Infills consist of a trapezoidal shaped ROCKWOOL insulation which can be engineered to suit all types of perforated metal roof deck profiles.

Acoustic Infills provide a high-density, fibrous solution that delivers sound absorption, designed and tested for use within ROCKWOOL HardRock® roof systems.

*For further information on acoustic performance, please refer to the product datasheet. Acoustic Infills for different deck types, such as those from Joricide, Euroclad, and Firth Steels, can be made to order subject to minimum order quantities. For further details please contact your local ROCKWOOL sales representative.*

# Floor solutions

ROCKWOOL insulation offers solutions for all types of floor, including ground floors, separating floors, and intermediate floors.

Energy efficiency and sound management are key to creating comfortable and healthy working and living environments. The thermal and acoustic performance of floor systems is an essential consideration when developing specifications for all building types.

## RockFloor®

RockFloor® solutions are split into two families; Thermal RockFloor®, designed for the thermal insulation of ground and separating floors, and Acoustic RockFloor®, developed to provide sound absorption in internal and separating floors.

### Acoustic RockFloor®

Pallet size: 1200mm x 1000mm

Product code	Thickness (mm)	Width (mm)	Length (mm)	Boards/Pallet	Area/Pallet (m <sup>2</sup> )	Made to Order	MOQ (Pallet)	List price/m <sup>2</sup>

125056	100	600	1000	24	14.40			£70.88

# Roll products

Installing the right insulation can go a long way to keeping homes warm throughout the winter months. According to the Energy Savings Trust, a quarter of heat is lost through the roof of an uninsulated home.

A well-insulated loft space can prevent heat from escaping homes through the roof, resulting in a warmer home. Energy-efficient homes tend to have reduced energy bills and a more comfortable living environment.

When choosing loft insulation, it is important to ensure the right thickness of insulation is installed. The current building guidelines recommend 300mm insulation thickness, but in many homes currently, there is as little as 100mm. This can be particularly true for older houses. Insulation performance plays an important role when choosing the right insulation, factors such as fire resistance and moisture repellence are often overlooked but can make a difference in the lifespan of the insulation material.

## Roll products

ROCKWOOL Roll, Twin Roll and Rollbatt are medium-density, non-combustible thermal insulation products for roof and loft spaces. They are made from stone wool, have thermal properties, and are sound absorbent.

### Twin Roll

# Slab products

The ROCKWOOL Slab insulation ranges provide thermal, acoustic, and fire resilience (Euroclass A1) for the general building market, in multiple applications including floors, walls, and roofs.

The product ranges consist of resin bonded slabs in a variety of thicknesses and densities.

The ROCKWOOL Slab range is CE marked according to EN 13162:2012 +A1:2015.

*For further information on product performance, please refer to the product datasheets.*

## Flexi®

Flexi® is a multi-use, dual-purpose thermal, and acoustic insulation product with a unique flexible edge along one side.

The flexible edge ensures a fit is maintained between the product and its supporting framework.

# Structural and Cavity Fire Protection products

In the event of a fire, our tested fire protection solutions slow the spread of the flames. ROCKWOOL stone wool does not produce any significant toxic smoke and also helps protect the building's load-bearing structure, protecting lives and investment.

By protecting the structural frame of the building from destruction by fire, it is possible to give occupants more time to escape, and to limit damage to the building.

ROCKWOOL stone wool insulation can tolerate temperatures in excess of 1000°C and demonstrates proven fire resilience.

*For further information on product performance, please refer to the product datasheets.*

## BeamClad®

ROCKWOOL BeamClad® is a non-combustible stone wool insulation slab, designed and tested to provide up to 4 hours' protection to structural steel.\*

### Benefits:

- Up to 4 hours' fire resistance\*
- Dry-fix or adhered installation
- Moisture repellent
- No maintenance

\*Subject to the application.

Approximate coverage 10.2m<sup>2</sup>/tub subject to application thickness.

## Fire Barrier EN

ROCKWOOL Fire Barrier EN is a wire-reinforced high-density stone wool roll designed for inhibiting the passage of fire and smoke through extensive cavities within buildings.

The product has been classified to BS EN 13501-2:2016 based on testing to the following standards:

- BS EN 1364-1:2015
- BS EN 1634-1:2014+A1:2018
- BS EN 1366-3:2021

For further details please see the product's UL Classification Reports available on our website.

### Fire Barrier EN

## SP FireStop EN

SP FireStop EN comprises of a stone wool slab faced with high emissivity black aluminium foil on both sides and is supplied in two thickness options depending on the fire rating required.

SP FireStop EN has been tested in accordance with BS EN 1366-4:2021 and is suitable for use as a linear cavity firestop in both vertical and horizontal orientations.

Benefits:

- Tested against an SFS substrate both horizontally and vertically
- Up to EI 120 in cavities up to 600mm\*
- Resists the passage of smoke - black aluminium foil on both sides

\*Subject to the application.

### SP FireStop EN Slab

Pallet size: 2000mm x 1200mm

Dovetail Infills may incur additional carriage charges, for further information please contact the ROCKWOOL Customer Support Centre.

## Linear FireStop 2A

Linear FireStop 2A provides fire-stopping at the junctions of compartment walls and floors. Tested to BS EN 1366-4:2021 and BS EN 1366-3:2021, they provide up to 4 hours\* fire integrity, fitted as rectangular pieces that tightly butt joint and must be compressed by at least 5% in thickness to ensure a secure fit.

**Benefits:**

- Provides up to 4 hours\* fire integrity
- Available in small quantities

*\*Subject to the application.*

200	£4.52	£7.64	£8.26	£10.89	£13.87	£16.58	•

In addition to the sizes shown, ROCKWOOL manufactures a wide range of linear and trapezoidal fire-stop pieces to suit most applications. Linear FireStop 2A may incur additional carriage charges, for further information please contact the ROCKWOOL Customer Support Centre.

## Trapezoidal FireStop 2B

Trapezoidal FireStop 2B helps to prevent the passage of fire and smoke in the deck at the junction of compartment walls and floors. Manufactured slightly oversized to the deck profile to ensure a tight, gap-free fit.

Deck profile to be named at the time of order. Alternatively, if deck brand is unknown, measurements detailed on the left must be provided.

Length: 1200mm

Linear and Trapezoidal FireStop orders cannot be used to contribute towards mixed loads.

The lead times for these products can vary and will be confirmed on receipt of order.

Trapezoidal FireStop 2B may incur additional carriage charges, for further information please contact the ROCKWOOL Customer Support Centre.

## SCB

ROCKWOOL SCB (Sleeved Cavity Barrier) consists of a stone wool insulation strip encapsulated in a protective polythene sleeve. Fitted under compression, the product acts to inhibit the passage of smoke and fire within masonry, timber and steel frame constructions.

ROCKWOOL SCB has been tested in accordance with BS EN 1364-4:2021 and classified to BS EN 13501-2:2016. For further details please see the product's UL Classification Report available on our website.

Product is supplied in bags packed into cardboard tubes secured on a 1200mm x 1200mm pallet.  
\*Thicknesses marked by an asterisk are supplied in cardboard boxes secured on a 1300mm x 1200mm pallet.  
Available in full pallet quantities only.

## Soffit Slab

Soffit Slab is a non-combustible stone wool insulation designed for concrete soffits, offering thermal performance and fire resistance.

Benefits:

- Non-combustible
- Water repellent
- Up to 4 hours' fire resistance\*
- High-Impact version features 6mm fibre cement facing board

\*Subject to the application.

Soffit Slab - High Impact orders cannot be used to contribute towards mixed loads. The lead times for these products can vary and will be confirmed on receipt of order. Contact Customer Services for more information.

# Fire-stopping solutions

Fire-stopping solutions help to ensure that the fire resistance of compartment walls, floors, and roofs are not compromised by services or voids in the event of a fire.

To stop fire spreading, UK Building Regulations insist on effective compartmentation, where fire, smoke, and gases must be kept for as long as possible where they have originated. Our range of fire-stopping products ensure that cables, pipes, trunking, or ductwork, or the voids that they pass through, don't provide the weak link through which fire can spread.

Our comprehensive range of penetration seals, cavity barriers, cavity fire stops, and linear joint seals are listed in this section and suitable for most applications. However, if your requirement is a little out of the ordinary, contact your local ROCKWOOL representative, you can get their details at: [rockwool.com/uk/contact-us/](http://rockwool.com/uk/contact-us/)

*For further information on product performance, please refer to the product datasheets.*

## NEW RANGE

### FirePro® CB50

Replacing: FirePro® Ablative Coated Batt

FirePro CB50 is an ablative coated batt, consisting of a high-density stone wool core with an outer layer of water based ablative coating.

FirePro CB50 forms part of a fire-stopping solution to seal apertures within a building structure which allow the passage of multiple building services as required.

Designed to reinstate the fire resistance of compartment walls and floors, FirePro CB50 provides fire resistance of up to 120 minutes in accordance with EN 1366-3: 2021+A1:2024, subject to the application.

Pallet size: 1200mm x 1200mm

Product code	Thickness (mm)	Width (mm)	Length (mm)	Pieces/Pallet	Area/Pallet (m <sup>2</sup> )	List price/Batt
368744	50	600	1200	48	34.56	£22.94

### FirePro® CB Coating

Replacing: FirePro® Ablative Liquid

FirePro CB Coating is available in white and supplied in 5L tubs, and is available separately to enable site repairs to FirePro CB50 ablative coated batts that may have been damaged during installation.

Product code	Additional information	Tub size (Litre)	Unit	MOQ (Tub)	List price/Tub
363381	FirePro CB Coating	5	Tub	1	£50.38

For coverage details, please refer to our Technical Datasheet.

### FirePro® AIS

Replacing: FirePro® Acoustic Intumescent Sealant

FirePro AIS can be used as both a fire resistant seal within construction joints and to seal FirePro CB50 within penetration seals.

Designed to reinstate the fire resistance of compartment walls and floors, FirePro AIS provides fire resistance of up to 240 hours in accordance with EN 1366-3: 2021 and EN 1366-4:2021, subject to the application.

Pallet size: 1200mm x 1200mm

Product code	Additional information	Cartridge size (ml)	Tub size (kg)	Unit	Units/Box	Boxes/Pallet	MOQ	Unit list price
363377	Sealant	310		Box	25	64	1 Box	£82.16/Box
363379	Sealant	600		Sausage	12	65	1 Box	£79.63/Box
363378	Trowel Grade		5	Tub		72*	1 Tub	£56.85/Tub

\*The figure quoted is for units/tubs per pallet. For coverage details, please refer to our Technical Datasheet.

## FirePro® Compound

FirePro® Compound is a specially formulated gypsum-based compound, which is mixed with water to be trowelled or poured around service penetrations.

Product code	Bag size (kg)	MOQ (Bag)	List price/ Each
128059	22	1	£62.33

For coverage details, please refer to our Technical Datasheet.

## FirePro® HES

Replacing: FirePro® High Expansion Intumescent Sealant

FirePro HES has been tested as a fire resisting penetration seal, designed to provide high volume expansion and pressure sealing to close off the void left by combustible services after exposure to fire.

FirePro HES provides fire resistance of up to 240 minutes in accordance with EN 1366-3: 2021+A1:2024, for fire-stopping where services penetrate walls and floors, subject to the application.

Product Code	Additional Information	Cartridge Size (ml)	Cartridges/ Pack	MOQ (Pack)	List Price/ Box
363380	Grey	310	25	1	£651.54

For coverage details, please refer to our Technical Datasheet.

## FirePro® PWRoll

Replacing: FirePro® Intumescent Pipe Wrap CE/Pipe Wrap Roll

FirePro PWRoll is an extruded graphite-based intumescent that provides a high volume expansion and pressure seal around services when exposed to fire.

Supplied as a 25m roll to reduce the need to carry a wide range of individually sizes fire-stopping products, the product is 40mm wide, 2mm thick and is suitable for pipes up to 250mm O.D.

FirePro PWRoll provides fire resistance of up to 240 minutes in accordance with EN 1366-3: 2021+A1:2024, for fire-stopping where services penetrate floors, and walls, subject to the application.

Product code	Roll size (m)	Rolls/ Box	MOQ (Box)	List price/ Box
363376	25	1	1	£508.63

For further information on shipping options, please contact our customer support team. Please be advised that orders for these products may incur additional carriage charges.

## NEW RANGE

### FirePro® Pipe Collar

Replacing: FirePro® Pipe Collar CE

FirePro Pipe Collar is suitable for use on flexible walls, rigid walls, and rigid floor constructions, and is tested as a penetration seal to reinstate the fire performance of the wall or floor construction.

FirePro Pipe Collar provides fire resistance of up to 240 minutes in accordance with EN 1366-3: 2021+A1:2024, for fire-stopping where services penetrate floors, and up to 120 minutes in flexible and rigid wall constructions, subject to the application.

Product code	Nominal O/D (mm)	MOQ (Each)	List price/ Each
363382	40	1	£23.20
363383	55	1	£27.90
363384	63	1	£29.02
363385	75	1	£40.56
363386	82	1	£41.99
363387	90	1	£49.72
363388	110	1	£58.29
363389	125	1	£77.49
363390	140	1	£125.75
363391	160	1	£137.93

### FirePro® Rapid Seal

FirePro Rapid Seal is a flexible, silicone-based intumescent polymer, engineered to expand and form an insulating char when exposed to fire. Sized as a 60mm or 100mm diameter disc, tested in accordance with BS EN 1366-3: 2021+A1:2024.

Product code	To suit service opening	Diameter (mm)	Pieces/ Pack	MOQ (Box)	List price/ Each
363374	25mm x 25mm	60	20	1	£89.48
363375	50mm x 50mm	100	20	1	£116.12

## FirePro® Socket Pad

FirePro Socket Pad is a flexible, silicone-based intumescent polymer, engineered to expand and form an insulating char when exposed to fire, effectively sealing penetrations to prevent the spread of fire and smoke.

Tested in accordance with BS EN 1366-3: 2021+A1:2024.

Pre-cut for installation with single or double socket boxes.

Product code	Additional information	Pad/Box	MOQ (Each)	List price/ Each
363372	Internal Single	20	1	£12.16
363373	Internal Double	20	1	£17.51

## FirePro® Flex Seal

FirePro Flex Seal Coated Strip is designed for use in penetration seals within fire-rated constructions.

FirePro Flex Seal Coated Strip can be used as a standalone penetration seal or as part of the CB50 coated batt seal.

FirePro Flex Seal Coated Strip has replaced FirePro SoftSeal Coated Strip as the new EN-tested solution.

### FirePro® Flex Seal

Product code	Additional information	Thickness (mm)	Width (mm)	Length (mm)	Pieces/pallet	Area/pallet (m <sup>2</sup> )	Made to Order	MOQ (Pallet)	List Price/each
363369	Coated Strip - Coated 2 sides	100	200	1200	72	17.28	•	1	£43.67

### FirePro® Flex Seal Coating

# Next-generation FirePro®

**Introducing next-generation FirePro®, ROCKWOOL's new range of fire-stopping products.**

Tested and classified to the latest relevant EN fire resistance standards, holding third party certification under the UL-EU Mark, our new FirePro range supports ongoing innovation and the pursuit of industry leading performance and sustainability.

**Make the switch to next-generation FirePro.**

# Download our new Fire-stopping Standard Details Guide

Let us help you to specify our new fire-stopping products with confidence. The Fire-stopping Standard Details Guide gives you in-depth guidance on the performance parameters of our passive fire-stopping products.

These standard details provide the technical information you need to specify FirePro® products, including fire resistance testing, classification, and third-party product certification.

## EXISTING RANGE

### FirePro® Silicone X

Supplied in 310ml cartridges, FirePro® Silicone X is a fire resistant silicone sealant designed for use as a linear joint seal within construction joints of walls and floors. Silicone X is white in colour and is suitable for construction joints of up to 60mm.

#### Benefits:

- Suitable for internal and external use
- Can provide a cold smoke seal
- Tested with multiple substrates
- Cartridges contain 30% recycled plastic

Product Code	Additional Information	Cartridge Size (ml)	Cartridges/ Pack	MOQ (Pack)	List Price/ Cartridge
322075	White	310	25	1	£20.09

For coverage details, please refer to our Technical Datasheet.

### FirePro® Insulated Fire Sleeves

Insulated Fire Sleeves are made up of a combination of stone wool and graphite intumescent; as a result, they provide both thermal insulation and fire resilience.

When exposed to fire, they expand, sealing gaps between the sleeve and the surrounding construction/pipework.

Length: 300mm

Product code	Nominal O/D (mm)	Thickness (mm)	Made to Order	MOQ (Pieces)	List price/ Each
128109	17	25	•	1	£79.40

## FirePro® Intumescent Pillow CE

FirePro® Intumescent Pillows CE are available in various sizes for packing into void spaces around services. They are a suitable solution when installing additional services, as they can be removed and reinstated.

Intumescent Pillows CE can be installed within rigid wall and rigid floor constructions. Intumescent Pillows CE are designed to create a temporary or permanent fire seal around services to maintain continuity of fire performance of compartment walls and floors.

Product Code	Thickness (mm)	Width (mm)	Length (mm)	MOQ (Each)	List Price/Each
301310	20	50	330	1	£17.17
301311	25	200	330	1	£23.43
301313	45	200	330	1	£26.80

For further information on shipping options, please contact our customer support team. Please be advised that orders for these products may incur additional carriage charges.

# Building Services and HVAC products

Heating Ventilation and Air Conditioning (HVAC) systems form an integral part of modern environments, both commercial and domestic – particularly where high rise and large scale developments are concerned.

ROCKWOOL non-combustible stone wool products for building services and HVAC applications can be used to help control heat gain, minimise heat loss, and reduce noise. In addition, certain products can deliver a fire resistance rating both into, and out of, the HVAC system.

## DuctSlab and DuctWrap

DuctSlab and DuctWrap provide thermal insulation for air conditioning, warm air, and extractor ducts, located either in plant rooms and boiler houses or externally. They can also be used to thermally insulate cold water storage tanks, feeds, and expansion tanks with service temperatures of up to 230°C.

DuctWrap consists of a flexible insulation roll faced with reinforced aluminium foil. DuctSlab consists of a semi-rigid insulation slab faced with reinforced aluminium foil.

### Benefits:

- CE marked to EN 14303:2009+A1:2013
- Non-combustible (Euroclass A1)
- Water repellent
- Chemically inert

*Alternative thicknesses can be made to order.*

*For details please contact your local ROCKWOOL representative.*

Pallet size: 1200mm x 1200mm

## DuoDuct Slab

DuoDuct is a dual-density stone wool slab with an aluminium foil facing bonded to the outer surface. The outer layer provides impact resistance and a suitable substrate for surface applications such as cladding.

Developed for use on rectangular or square external ductwork, DuoDuct Slab is suitable for insulating cold air, hot air, and dual-purpose duct systems – withstanding service temperatures of up to 230°C.

### Benefits:

- Euroclass A1 non-combustible
- Suitable for use with self-adhered external duct membranes
- ROCKWOOL dual-density technology provides enhanced impact resistance, suitable for areas susceptible to damage
- Sound absorbent qualities to reduce environmental noise

*Alternative thicknesses can be made to order. For details please contact your local ROCKWOOL representative.*

## DuctRock® Slab

Tested to BS EN 1366-1:2014 and BS EN 1366-8:2014, DuctRock® Slab is capable of providing up to 2 hours\* fire rating on both ventilation and smoke extract ducts. The new high emissivity black foil clearly identifies the product as the latest EN tested solution. DuctRock® Slab can achieve fire ratings ranging from EI30 to EI120 with only 3 thicknesses.

### Benefits:

- Up to 2 hours\* fire rating
- Black foil finish
- Suitable with many duct types
- Patented dry wall penetration detail

\*Subject to the application.

## RockLap H&V Pipe Supports

RockLap Pipe Supports have been developed to reduce the thermal bridge at the point at which the pipe hanger clips are located. Pre-formed and pre-cut into cylindrical sections, with a foil facing finish to maintain an integral vapour barrier. Combined with RockLap H&V Pipe Section insulation solutions, they provide a non-combustible, thermal solution for pipework.

Please contact ROCKWOOL Customer Support Centre for further information. Alternative sizes may be available. For further details please contact your ROCKWOOL Sales Representative.

### ALL PRODUCTS LISTED ARE MADE TO ORDER.

Delivery terms are dependent upon order size:

- ≥40 cartons: Fixed delivery date, no surcharge.
- 15-39 cartons: £70 small order surcharge, fixed delivery date.
- Orders <15 cartons: £70 small order surcharge and subject to groupage within a 5 working day range (Mon - Fri).

ROCKWOOL Limited is committed to supporting specifiers, resellers and users of ROCKWOOL products for the full life cycle of the product to comply with the obligations and responsibilities set out in the Building Safety Act 2022. With regard to the general safety requirements of the Act, ROCKWOOL Limited cannot control or foresee every situation where its products might be used. We therefore strongly advise that specifiers, resellers and users contact us where use of ROCKWOOL products is contemplated in applications different from those explicitly described in the latest, relevant ROCKWOOL product datasheets; especially in applications that can be reasonably foreseen as critical to safety.

ROCKWOOL Limited reserves the right to amend the specification of its products without notice. Changes to the ROCKWOOL manufacturing process, or to pertinent regulations, may be reflected in changes to tested and certified product performance. Whilst ROCKWOOL Limited endeavours to keep its publications up to date, readers will appreciate that between publications there may be pertinent changes in the law or other developments affecting the accuracy of the information contained in our publications.

ROCKWOOL Limited does not accept responsibility for the consequences of using (including testing or certifying) its products in applications different from those explicitly described in the relevant ROCKWOOL product datasheets. Expert advice should be sought, and ROCKWOOL Limited should be contacted, where such different use is contemplated, or where the extent of any use described by ROCKWOOL Limited is in doubt.

**The ROCKWOOL Trademark**

ROCKWOOL® – our trademark

The ROCKWOOL trademark was initially registered in Denmark as a logo mark back in 1936. In 1937, it was accompanied with a word mark registration; a registration which is now extended to more than 60 countries around the world.

The ROCKWOOL trademark is one of the most important assets of the ROCKWOOL Group, and is therefore well-protected and defended by ROCKWOOL throughout the world.

If you require permission to use the ROCKWOOL logo for your business, advertising or promotion, you must apply for a Trade Mark Usage Agreement.

To apply, write to:  
[marketcom@rockwool.com](mailto:marketcom@rockwool.com)

**Trademarks**

Registered trademarks of the ROCKWOOL Group include but are not limited to:

ROCKWOOL®, RockClose®, RainScreen Duo Slab®, HardRock®, RockFloor® Flexi®, RockFall®, FirePro®, DuctRock®, BeamClad®, NyRock®
