

DECLARATION OF PERFORMANCE

No. 0764-CPR-0388 – UK – vs01

1. *Unique identification code of the product type:*
Rockpanel A2, 8 mm finish Colours, Rockpanel A2, 8 mm finish Nordic and Rockpanel A2, 8 mm finish ProtectPlus.
2. *Type, batch or serial number or any other element allowing identification of the construction product as required pursuant to Article 11 (4):*
Backside print on the board.
3. *Intended use / es*
Internal and external wall and ceiling finishes.
4. *Manufacturer*
ROCKWOOL B.V.
Industrieweg 15
NL-6045 JG Roermond, Netherlands
Tel.: +31 475 353 353
5. *System or systems of AVCP (assessment and verification of constancy of performance of the construction product) as set out in Annex V (amended by: OJ L 157, 27.5.2014, p. 76–79):*
System 1 for reaction to fire and system 2+ for other characteristics
6. *European Assessment Document:*
EAD 090001-00-0404 for Prefabricated compressed mineral wool boards with organic and inorganic finish and with specified fastening system.

European Technical Assessment: ETA-24/0910 of 2025-01-28

Technical Assessment Body ETA-Danmark A/S
Göteborg Plads 1, DK-2150 Nordhavn, Denmark
Tel.: +45 72 24 59 00
Fax.: +45 72 24 59 04
Internet: www.etadanmark.dk

Notified Body: Materialprüfanstalt für das Bauwesen
Nienburger Strasse 3, D-30167 Hannover, Germany
Notified Body 0764
Tel.: +49 511 762 3104
Fax.: +49 511 762 4001
Internet: www.mpa-bau.de

and issued: **Certificate of Constancy of performance**
No. 0764 – CPR – 0388

7. Characteristics of the product

The Rockpanel A2, 8 mm Colours panels are surface treated on one side with water-borne primer- and water-borne coloured paint layers, in a range of colours.

The Rockpanel A2, 8 mm Nordic panels are surface treated on one side with water-borne coloured coating layers, in a range of colours.

The Rockpanel A2, 8 mm ProtectPlus panels are surface treated on one side with water-borne primer and a water-borne coloured paint, which has been provided with an extra anti-graffiti clear coat on top of the colour paint. The finishes “Woods”, “Stones” and “Chameleon” contain an (additional) design layer on top of the coloured paint. In the event of “Textured” the front side of the board has a slightly textured surface with depths between the product tolerances of +/- 0.5 mm.

The physical properties of ‘Rockpanel A2, 8 mm are indicated below:

Thickness	8 mm
length, max	3050 mm
width, max	1250 mm
density nominal	1170 kg/m ³
bending strength	length and width $f_{05} \geq 27 \text{ N/mm}^2$
Modulus of Elasticity	4015 N/mm ²
Thermal conductivity	0.47 W/(m.K)

Clause 8 contains the performances of Rockpanel A2, 8 mm.

8. Declared performance

Table 1 – Euroclass classification of different constructions with Rockpanel A2, 8 mm boards

<i>Essential characteristics</i>		Basic requirements for construction works BR2 – Safety in case of fire		
<i>Harmonised technical specification</i>		ETA-24/0910 issued on 2025-01-28 EN 13501-1		
<i>Performance</i>				
Fixing method	Finish	Set-up	Timber subframe	Metal subframe
Mechanically fixed	Colours	Non-ventilated. Cavity filled with mineral wool	A2-s1,d0 Closed horizontal joint	
	Colours, Nordic, ProtectPlus	Ventilated with EPDM gasket on the battens [a] [c]	A2-s2,d0 Open 8 mm joint	
	Nordic	Ventilated with EPDM gasket on the battens and windboard in front of the insulation [a] [b]	A2-s1,d0 Open 8 mm joint	
	Colours, ProtectPlus	Ventilated, 28 mm with vertical planks ($\geq 100 \text{ mm}$)		A2-s1,d0 Open 10 mm joint

[a]: Width of the gasket 15 mm at both sides wider than the batten

[b]: The windboard is specified minimum A2-s1,d0 (according EN 13501-1) and K₁10 (according EN 13501-2) and placed between the subframe and the insulation.

[c]: A breathable membrane (minimum class B-s1,d0 according EN 13501-1) can be added between the subframe and the insulation.

Field of application

The following field of application applies.

Euroclass classification

The classification mentioned in table 1 is valid for the following end use conditions:

Mounting

- Mechanically fixed as described in table 1, attached to a timber or metal subframe.
- The panels are backed with minimum 50 mm mineral wool insulation with density 30-70 kg/m³ according to EN 13162 with a cavity between the panels and the insulation. See section Insulation below.

Substrates:

- Concrete walls, masonry walls and timber framing

Insulation:

- Ventilated constructions: The subframe is backed with minimum 50 mm mineral wool insulation with density 30-70 kg/m³ according to EN 13162 with a cavity of minimum 28 mm for metal subframes and minimal 25 mm for timber subframes between the panels and the insulation.
- Non-ventilated constructions: The panels are backed with minimum 40 mm mineral wool insulation with 30-70 kg/m³ between the battens and minimum 50 mm with density 30-70 kg/m³ behind the battens without an air gap.
- Results are also valid for a greater thickness of mineral wool insulation with the same density and the same or better reaction to fire classification.
- The results also apply to panels without insulation, if the substrate chosen according to EN 13238 is made of a panel with Euroclass A1 or A2 (e.g. fibre-cement panels).

Subframe:

- Vertical softwood battens without fire retardant treatment, thickness minimum 25 mm.
- Test results are also valid for the same type of panel with an aluminium or steel frame.
- Test results are also valid for the same type of panel with vertical LVL battens, without fire retardant treatment, thickness minimum 27 mm.

Fixings:

- The results are also valid when using smaller mounting distances.
- Test results are also valid for the same type of panel fixed by rivets made of the same material of screws and vice versa.

Cavity:

- Unfilled or filled with insulation of stone wool with a nominal density 30-70 kg/m³ according to EN 13162.
- The depth of the cavity is minimum 28 mm for a metal subframe, and minimum 25 mm for a timber subframe.
- Test results are also valid for other higher thicknesses of air space between the back of the board and the insulation.

Joints:

- Horizontal joints can be open or closed with an aluminium profile. In the event of a non-ventilated construction an EPDM foam gasket (self-adhering backside) is obliged.
- For metal subframes the vertical joints are without a gasket backing.
- For timber subframes the vertical battens are with an EPDM foam gasket (Celdex EPDM Soft EP-4530).
- The result from a test with an open horizontal joint is also valid for the same type of panel used in applications with horizontal joints closed by steel or aluminium profiles.

The classification is also valid for the following product parameters:

Thickness: Nominal 8 mm
 Density: Nominal 1170 kg/m³

Table 2 – Performance – Water vapour permeability and water permeability

Essential characteristics		BR3 – Hygiene, Health and environment
Property	Declared values	Harmonised technical specification
Water vapour permeability	A2, 8 mm Colours: $s_d < 1.7$ m at 23°C and 85% RH A2, 8 mm Nordic: $s_d < 1.65$ m at 23°C and 85% RH A2, 8 mm ProtectPlus $s_d < 3.2$ m at 23°C and 85% RH The designer shall consider the relevant needs for ventilation, heating and insulation to minimise condensation in service.	ETA-24/0910 issued on 2025-01-28 EN ISO 12572 test condition B
Water permeability	Incl. joints for non-ventilated applications: NPD	ETA-24/0910 issued on 2025-01-28

Table 3 – Performance – Release of dangerous substances

Essential characteristics		BR3 – Hygiene, Health and environment
Property	Product specification	
Dangerous substances	The kit does not contain/release dangerous substances specified in TR 034, dated April 2013*), except Formaldehyde concentration 0.0105 mg/m ³ . Formaldehyde class E1. The used fibres are not potential carcinogenic No biocides are used in the Rockpanel boards No flame retardant is used in the boards No cadmium is used in the boards.	
		Harmonised technical specification ETA-24/0910 issued on 2025-01-28

*) In addition to the specific clauses relating to dangerous substances contained in this European technical Assessment, there may be other requirements applicable to the products falling within its scope (e.g. transposed European legislation and national laws, regulations and administrative provisions). In order to meet the provisions of the Construction Products Regulation, these requirements need also to be complied with, when and where they apply.

Table 4a – Performance – Design value of the axial load for mechanical fixing 8 mm Rockpanel A2 boards
Subframe: solid wood / metal

Essential characteristics		BR4 – Safety in use			
Harmonised technical specification		ETA-24/0910 issued on 2025-01-28 EN 14592:2008+A1:2012 (E)			
For service class 2 (see 'Note') and load-duration class 'Instantaneous' [c]. For hole diameters fixings see table 5					
Property	8 mm boards	Span in mm [b]		$X_d = X_k / \gamma_M$ in N Middle / Edge/ Corner	Table in ETA
